

G3.5

Insert with AutoFire™

TWO DECADES
OF LEGENDARY HEAT.

 **Valor** Radiant
Gas Fireplaces

THE SCIENCE OF WARMTH™

Since 1890, we've been pioneering and perfecting radiant heat technology that generates constant, comfortable warmth within your home.

RADIANT HEAT

What's makes Valor unique? We put radiant heat technology into every fire. You can feel it.

AUTOFIRE™

Pioneered by Valor, AutoFire automatically adjusts the fire for optimum efficiency and enjoyment.

EFFICIENCY

Radiant zone heating is up to 25% more efficient than central forced air systems.

REMOTE CONTROL

Adjustable flame for constant, even warmth without having to cycle the fire on and off—or leave the sofa.

SAFETY

Our fires are put through rigorous safety testing in our in-house CSA approved lab.

REALISTIC LOGS

High definition, low mass fiber ceramic logs heat up and glow quickly, radiating warmth.

COVER:
Birch with
Reflective Glass liner
Craftsman Pewter front
with Black Backing plate

TRADITIONAL LOGS

CONVECTIVE HEAT

Secondary Heat Exchanger naturally improves convective heat—without a fan.

V-CLASS BURNER

Our precision stainless steel V-Class burner creates an enhanced flame and ember glow.

NO POWER. NO PROBLEM.

Valor fireplaces heat without electricity—even in a power failure.

CERAMIC GLASS

Durable and robust ceramic glass improves radiant performance.

SUPERIOR ALUMINIZED STEEL

Aerodynamic aluminized steel firebox handles high temperatures, delivering efficient radiant warmth.

Please Note: Printed images may vary from actual product. All product information is accurate at time of printing and is subject to change. For more information, visit valorfireplaces.com

**PROUDLY MADE
IN NORTH AMERICA**

INSERT GAS FIREPLACES

Old wood fireplaces are highly inefficient heaters. Replace yours with a gas insert for an air-sealed, energy efficient and easy-to-use source of home comfort.

1 LOGS

We design all our expertly crafted logs as realistic-looking as possible, and engineer them to harness radiant heat from the flames and glowing embers.

WITH BLACK BACKING PLATE

To see in person, visit your local Valor dealer; or go to valorfireplaces/g35 for photos and videos of the fuel beds.

This minimalist Pebble Beach Driftwood has an easygoing flame and beachy look.

The modern Murano's clear tumbled glass is illuminated by the fire, casting reflections on the glass base.

PEBBLE BEACH DRIFTWOOD

MURANO GLASS

TIP

Liners can appear quite different with the fire on compared to a natural light setting.

2

LINERS

Choose a firebox liner to complement the logs and front style you select as well as the surround of your current fireplace.

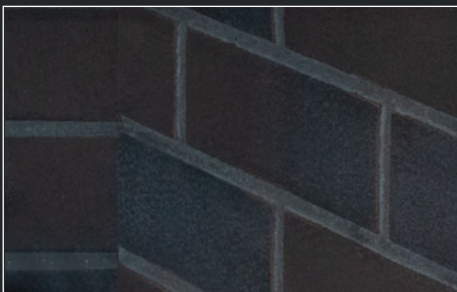

Please note the tint of the ceramic glass window can warm the liner colors, especially when the fire is on. If possible, visit your local Valor dealer to see a sample in person.

MANTEL CLEARANCES

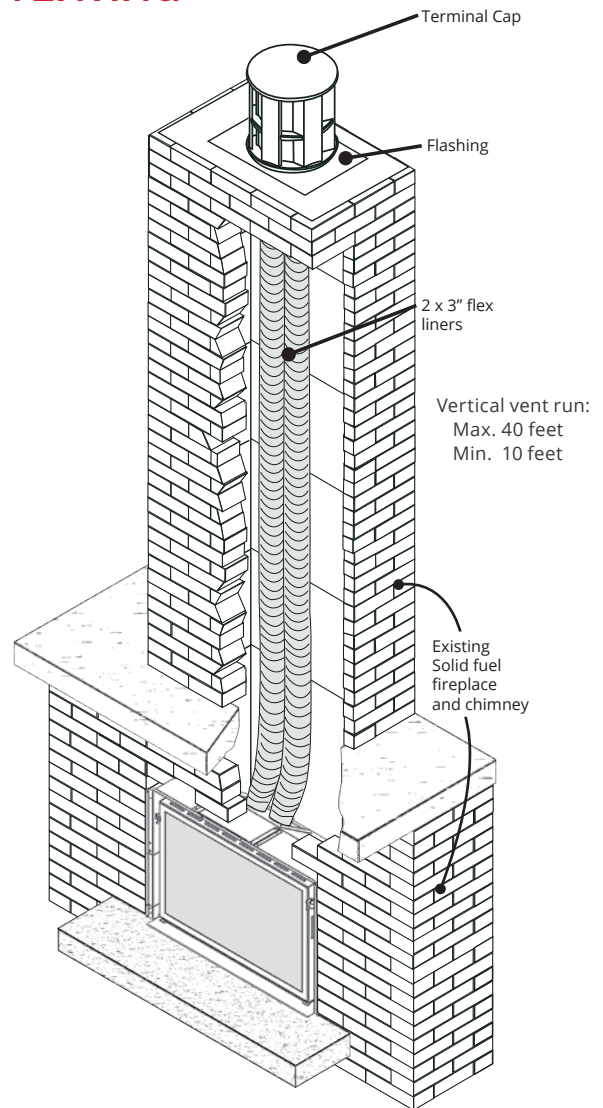

Mantel Projection A	0 - 6"	8"	10"	12"
Mantel Height B*	33"	35"	37"	39"

*Measured from underside of mantel to finished hearth or surface that unit sits on.

ALWAYS REFER TO THE MANUAL FOR COMPLETE INSTALLATION INSTRUCTIONS.

VENTING

⚠ WARNING

This product can expose you to chemicals including Benzene, which is known to the State of California to cause cancer and birth defects or other reproductive harm.
For more information go to www.P65Warnings.ca.gov

Note: Natural gas, in its original state, contains Benzene.

BACKING PLATES

EDGEMONT BACKING PLATES

All Edgemont, Hammered and Craftsman fronts require Edgemont backing plates, available in 3 and 4-sided styles and different thicknesses.

The fronts are slightly offset from the backing plate. See below.

NEW

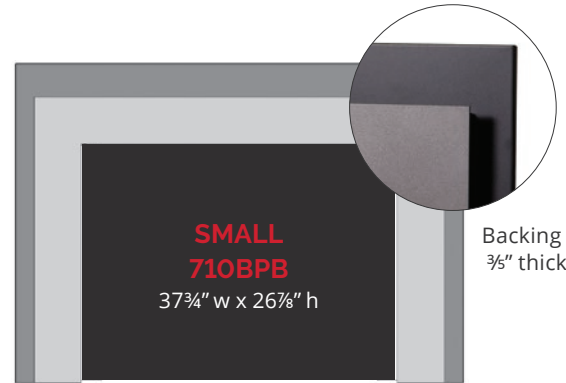

Backing plate:
1/8" thick.

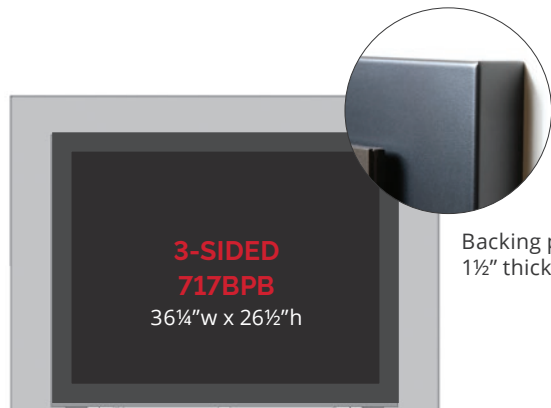

OTHER BACKING PLATES

The flat backing plates below pair with the 3" Floating fronts. Available in a small and large size, these backing plates may also be used with Edgemont backing plates to cover a larger opening.

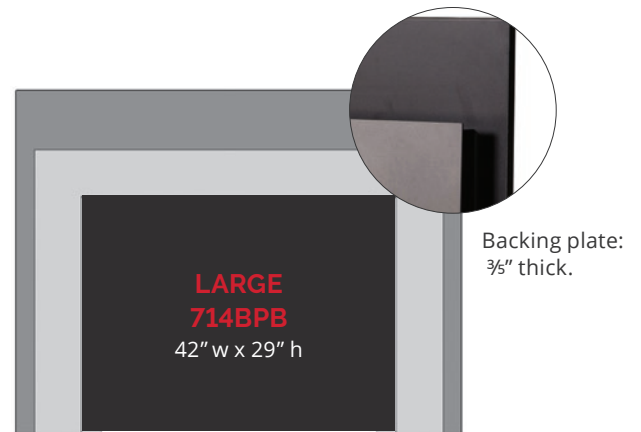

The Floating fronts sit proud of the backing plates by 1.5".

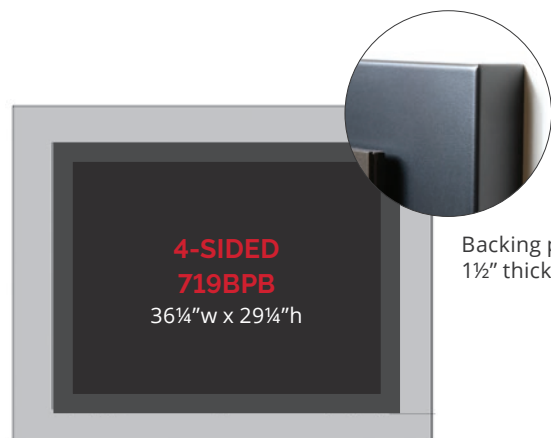

Backing plate:
3/8" thick.

Backing plate:
1 1/2" thick

Backing plate:

ABOUT OUR EFFICIENCY RATINGS

While the North American fireplace industry is largely self-regulated, at Valor we use recognized Canadian and US government testing methods to determine our energy efficiencies, and ensure our products perform in your home as rated. To find out more, visit valorfireplaces.com/efficiency

* EnerGuide Ratings and Outputs have been determined without a fan/blower, using the CSA P4.1-15 test method. Certified to ANSI Z21.88/ CSA 2.33 Vented Gas Fireplace Heater American National Standard. CGA — 2.17-91 Gas Fired Appliances for use at High Altitudes.
