# Signature Collection

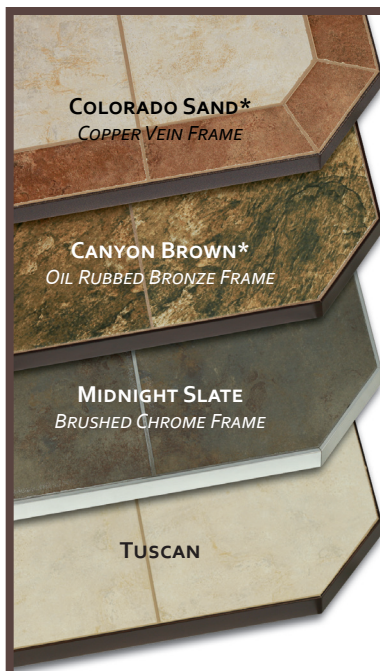

- 3 year warranty
- Stain-resistant grout
- Premium acrylic thinset insures strong bond
- Exceeds the UL 1618-2009 standard
- Type I Ember Protection
- Type II Thermal Protection (R 1.26)
- 1.25" Textured Black angle iron frame
- Optional colors available on frame
- CNC machined substrates
- High grade tile, stone or slate surface
- 4 stock sizes (36", 40", 48", 54")
- 2 stock shapes (*corner, standard*)
- Custom shapes and sizes available

Hearth pads in the Signature Collection provide the ultimate value in hearth safety. You can choose from multiple colors, each featuring a special combination of unique accents and premium frames.

Thermal protector material and substrates are CNC machined for a precise fit around the angle iron frame. This allows our hearth pads to sit flush on the floor with no spacers.

Steel frames are constructed of heavy angle iron and finished in a durable Textured Black powdercoat. Optional finishes are available for angle iron frame, as shown in italics on samples below.

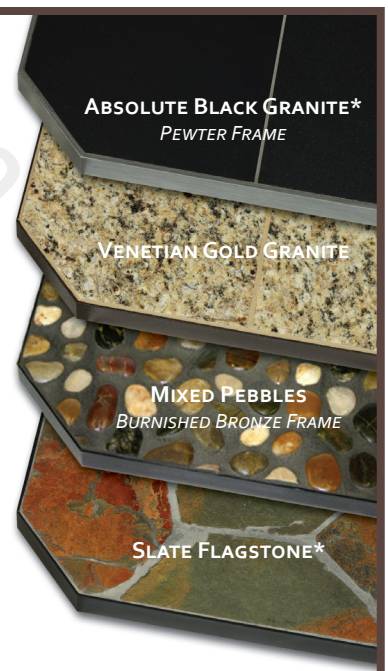

## COLOR GROUP I

## COLOR GROUP II

## COLOR GROUP III

All color groups are available as both Type I Ember Protection and Type II Thermal Protection.

# TrendStone Collection

- 3 year warranty
- Exceeds the UL 1618-2009 standard
- Type I Ember Protection
- Type II Thermal Protection (R 1.26)
- CNC machined substrates
- CNC machined edges
- High grade, 3cm granite surfaces
- 6 standard shapes
- 6 standard edge profiles
- Custom sizes
- Custom wall pads available to match

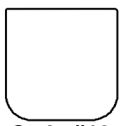

The TrendStone Collection is in a class of its own with 1.18" (3cm) high grade granite and unique edge profiles that are unlike anything else currently on the market. Choose from our 6 standard edge profiles and 6 standard shapes, or contact us for a custom quote.

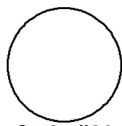

Our specialty is custom size and shape hearth pads and wall pads.. Whether alcove, corner, straight wall or stand alone, each pad is CNC machined for a perfect fit to provide a beautiful accent with comforting safety.

There is no wood or metal frame, just polished, profiled granite. Our artisans have decades of experience with granite; their attention to detail is clearly visible in the craftsmanship of our hearth pads.

## Signature | Type I Ember Protection

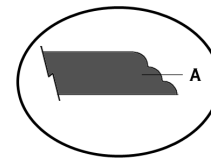

- A - Tile
- B - 1" fiberboard
- C - 1.25" iron frame
- 1.25" thick overall**
- R = 0

## Signature | Type II Thermal Protection

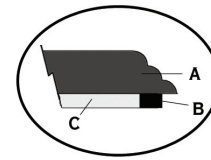

- A - Tile
- B - 1/2" Hardi-backer
- C - 1/2" Micore 300
- D - 1.25" iron frame
- 1.25" thick overall**
- R = 1.26\*

## Trendstone | Type I Ember Protection

- A - Granite/Marble
- 1.25" thick overall**
- R = 0

## Trendstone | Type II Thermal Protection

- A - Granite/Marble
- B - Edge Trim
- C - 1/2" Micore 300
- 1.75" thick overall**
- R = 1.26\*

\* "R value" can be increased by adding additional layers of Micore; this will also increase overall thickness.

Your Authorized Dealer:

### ARE CAROLINA PREMIER HEARTH PADS TESTED?

Yes. They all exceed the UL 1618-2009 standard as tested by Intertek Testing Services NA, Inc. Intertek is an independent testing lab certified by Underwriter Laboratories to test a product's ability to meet or exceed any given UL standard. For hearth pads, etc. they test to UL 1618-2009.

### WHAT IS UL 1618-2009?

It is a standard adopted in 2009 by Underwriters Laboratories for Wall Protectors, Floor Protectors and Hearth Extensions, and sets specific parameters relating to temperature resistance, temperature transfer, amount of heat, and time exposed to heat.

### WHAT IS THE DESIGNATION TYPE I OR TYPE II?

**Type I Ember Protection** is used in applications where thermal protection is not required, and the purpose of the hearth pad is to provide protection against accidental ash or ember spillage.

**Type II Thermal Protection** is used in applications where thermal protection IS required, and the purpose of the hearth pad is to keep excessive heat from reaching a combustible surface. Properly tested Type II hearth pads will be labeled with their thermal resistance value, which is designated as "R value".
