CONTEMPORARY GAS FIRES

THE STORY OF ALTERNATM ...

The Rasmussen Alternative to Traditional Gas Log Sets

Rasmussen Gas Logs & Grills recognizes that the “typical” gas log sets are not for everyone. Many people have homes with modern or contemporary décor in which ordinary gas logs would be out of place.

This led us to develop and then introduce FireBallsTM over twenty-five years ago. And more recently, we introduced FireStonesTM, FireShapesTM, and FireGlitterTM. Our latest innovations are vent-free versions of these alternative styles.

In recognition of the increasing desire for these alternative styles, Rasmussen has created the ALTERNATM brand for our vented and vent-free versions of FireBallsTM, FireShapesTM,

FireStonesTM and FireGlitterTM.

Each of the objects in the ALTERNATM line is made from the same high quality fireproof material as our gas logs. The objects are available in a variety of colors.

Vented sets are intended for use with either our Custom Pan Burner or Custom Embers Pan Burner.

Each type of vent-free set has its own special chassis/burner/control assembly.

All ALTERNATM vented sets can be outfitted with our “EASY”, Millivolt, or Electronic Ignition control systems. ALTERNATM Vent-Free sets are available with either a black or stainless steel chassis, and are equipped standard with “EASY” controls.

BURNERS

Burners are the heart of each ALTERNA set. Vented burners create a full, luminous flame, while vent-free burners produce a concentrated, efficient fire. All sizes and styles of ALTERNA burners are available in Black or Stainless Steel Finish. While Vent-free burners are limited to 20”, 24” and 30” sizes, Vented burners are available in sizes to fit virtually any fireplace.

Vented CS Burner

Burners in Stainless Steel

Vented CXF Burner

BLACK FINISH CHASSIS - In a darkened fireplace, the black chassis fades into the background while accentuating the objects and the flame.

STAINLESS STEEL FINISH CHASSIS- Provides a contrast to a darkened fireplace in which the chassis becomes a design element that complements the objects and the flame, giving a more contemporary appearance.

Vented CS Burner Pans are available as standard rectangular or custom-made tapered shapes. Installed flush on the floor or supported by flat or tubular legs, the pans work equally well in single or multi-sided fireplaces.

Vented CXF Burner Pans are tapered in shape and bring the flame to the hearth level. Features an adjustable rear leg to change the angle of display. For single sided fireplaces only.

All ALTERNA Vent-Free Systems feature a single opposed-louver lance-port burner for ultimate heat and appearance. Models available for both single-sided and see-through fireplaces.

Vent-free 24” Black Chassis

Double Faced Vent-free 24” Stainless Steel Chassis

FireShapes

VENTED

A variety of geometric shapes create an interesting display of angles and curves for the ultimate contemporary fireplace.

Individual FireShapes™ include two sizes each of Cones, Cylinders, three and four-faced Pyramids and Cubes, as well as Spheres and Half-Spheres. Colors can be mixed and matched to complement décor.

Large FireShapes in Beige and Adobe Red Colors

Small FireShapes in Natural Color

Mixed FireShapes in Natural Color

VENT-FREE

Single-sided sets have two tiers of FireShapes™ to create an orderly randomness of points, slants and arcs.

See-Thru sets have two rows of FireShapes™ with flame between the two. Single colors or combinations of colors can be used to create that perfect look.

30" Black and White FireShapes on Black Burner Chassis

20" Adobe Red FireShapes on Black Burner Chassis

24" Black and Beige FireShapes on Stainless Steel Burner Chassis

FireBalls™

VENTED

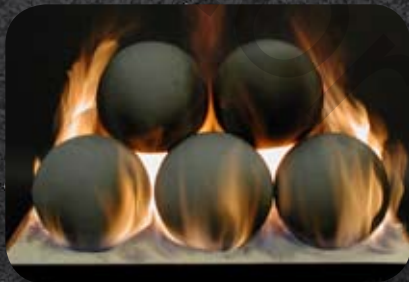

Uniform Size FireBall sets offer an orderly appearance of like-size balls on the CS Burner.

Mixed Size FireBall sets provide a random configuration and flame pattern, and are well suited for single (CS and CXF) and multi-sided fireplaces and firepits (CS).

Individual FireBalls™ are available in 2", 2.5", 3", 4", 6", 7" and 8" diameters, as well as 4", 6" and 7" half-balls.

Brown 4" FireBalls on CS Burner

Black 8" FireBalls on CS Burner

Mixed Size FireBalls in Natural Color on CXF Burner

VENT-FREE

Single-sided sets provide three tiers of 4" diameter FireBalls™ with the flame rising between the second and third rows.

The flame of the See-Thru sets emanates from the middle of the four tiers (two on each side).

Natural FireBalls on 30" Black Burner Chassis

Dark Gray FireBalls on 24" Stainless Steel Burner Chassis

Adobe Red FireBalls on 20" Black Burner Chassis

Fire Glitter

VENTED

A special linear burner creates a line of fire that rises through the bed of glass. The dancing flame is reflected in the face of each glass crystal, creating a very dynamic and thoroughly engaging display.

FireGlitter Burner with Blue-Green Glass

VENT-FREE

The wedge-shaped chassis of the high-efficiency burner system as well as the firebox floor is covered with the special glass to create an alluring presentation. For the minimalist the chassis/burner alone may be used for a pure flame effect.

20" SS Chassis with Copper Glass

20" Double-Faced SS Chassis

24" Stainless Steel Chassis

24" Black Chassis with Platinum Glass

24" Stainless Steel Chassis with Black Glass

30" Stainless Steel Chassis with Cobalt Glass

ALTEANA

VENTED

FireStones™ sets combine the two basic elements of earth and fire. Brilliantly patterned from nature's real stones, FireStones™ create an exciting visual display of multiple surfaces unlike any other fireplace product.

FireStones™ are available in specific set sizes and in assortment packs in extra large, large, medium, small and pebble sizes.

Calico FireStones on 24" CXF Burner

VENT-FREE

Single-sided sets have three rows of FireStones™ while See-Thru sets have two on each side. Single color and color combinations are available to beautifully complement the fireplace and room design.

Ceramic Stain Colors For FireShapes™, Fire-Balls™ and FireStones™

Rasmussen formulates our own proprietary, environmentally friendly ceramic stain colors which differ from paint due to the following inherent qualities:

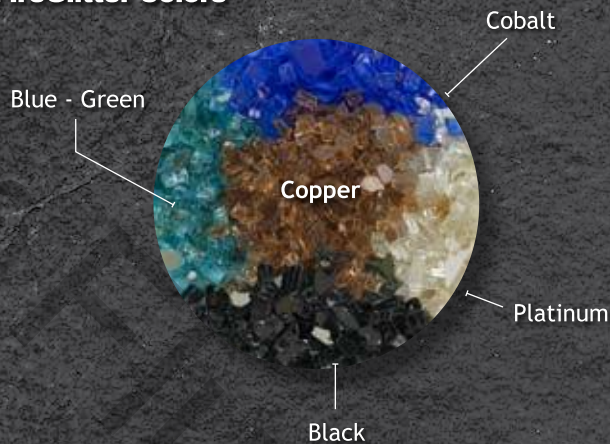

1) Ceramic Stain produces a transparent, non-uniform appearance as it absorbs into the material's pores, rather than merely covering the surface of the shape as paint does, thus enhancing the uniqueness of our products

2) Unlike paint, Ceramic Stain will not burn away under fire. Ceramic Stain will age gracefully.

Natural FireShapes

"EASY" Safety Pilot Lighting Controls

The "EASY" system uses a common valve that offers many control options and the ability to upgrade functionality at any time (no need to replace the whole system). Controls provide convenient lighting as well as safety shut down in the event of an interruption in the gas supply or a flameout. Good for 48" and smaller sets.

Manual Control (SPK3E)

Light burner and adjust flame height by turning knob.

Upgrade to Variable Remote from Manual with item #RE-UP1

Variable Flame Height Remote Control (RMC1E)

Light burner and adjust flame height by pushing button.

Upgrade to Remote Ready from Manual with item #SE-UP1

Switch/Remote Ready Control (RPK3E)

Light burner with receiver switch or one of five Wireless Transmitter Devices. Adjust flame height by turning knob.

24V systems- Install outside firebox

Battery Operated- Install inside firebox

4.25" w x 8" d x 5" h

Millivolt Safety Pilot Lighting Controls

ON/OFF Control with switch or remote lighting. Adjust flame height by turning knob.

Millivolt and EIS controls may be used with Home Automation Systems

Electronic Ignition/Pilot on Demand Controls

Pilot lights with each use by automatic spark. Pilot shuts down when burner is turned off.
