

Ventana 3-Sided Backing Plate and Bronze Square Trim Kit with Frontera Stone Liner

THE VENTANA GAS FIREPLACE FROM VALOR

The current large gas fireplace market consists of aesthetic driven products that in fact provide very little, highly inefficient heat. Breaking the industry mold, we've designed the Ventana to be our largest, most effective heater to date.

The perfect blend of radiant and convective heat provides efficient, steady warmth for the largest of spaces. Spectacular flames accompany clean, simple design elements that await your interior design inspirations.

Introducing a fireplace that mirrors presence with performance. Introducing the Ventana.

Ventana 1240BPK 3-Sided Backing Plate Kit with 1260BSL Black Slab Liner

VALOR VENTANA SPECIAL FEATURES

An impressive 60% turndown helps match the flame's intensity to your home comfort needs.

Recessed glass reduces reflection and eliminates the "aquarium effect" that you get with other gas fireplaces.

Smaller venting and tapered sides allow for installation in tight corners and limited spaces.

The Ventana is a fully functional heater that doesn't rely on electricity or a fan for heat.

Optional screen fronts not only add another design element and realism to your fire, they also provide added safety for young children.

VALORSTAT PLUS REMOTE CONTROL STANDARD WITH PURCHASE

The **ValorStat Plus** Remote Control gives you the power to select, adjust and program the desired temperature that you want. Timer and Thermostat mode help save energy and lower your home heating costs.

Pilot On Demand: The ValorStat Plus also has the ability to turn your pilot light **ON** and **OFF** from the programmable handheld remote.

FIREBOX LIGHTING

An adjustable lighting system is included with all Ventana units. Firebox lighting enhances the ambience in the room even when the fire is off.

VALOR WALL SWITCH KIT (OPTIONAL)

Light the pilot, then simply adjust the flame to your desired comfort level - all from one standard size switch. Lighting the pilot has never been so easy!
The wall switch works in conjunction with the ValorStat Plus handheld remote.

MULTI-ZONE HEAT MANAGEMENT REMOTE BLOWER KIT (OPTIONAL)

The 1270 Remote Blower Kit redistributes heat generated by the Ventana to other areas of your home. Maximize comfort levels by efficiently heating up to three separate living spaces, all from one fireplace! (View the spec page for more info.)

FINISHING OPTIONS

Designed to expand fireplace presence, the Bronze Square Trim Kit provides a clean, flat edge for finishing. There are several other trims and surrounds available in a wide collection of high quality finishes.

(See double page product spread).

CLEAN & SIMPLE

Available in both 3 and 4-sided designs, the Ventana backing plate trims provide a straight, clean surface for tile, rock, concrete or drywall.

MODERN APPEAL

Available in both 3 and 4-sided trim kits, the Metropolis provides the ultimate in clean, continuous design. Accessorize your brushed nickel trim with our matching Metropolis Andiron

(see double page product spread for more brushed nickel options).

TRADITIONAL REALISM

For those who seek the look and feel of a traditional wood burning fireplace, the Ventana Draw Screen Kit adds defining lines that accentuate realistic, glowing flames within.

CONSUMER AWARENESS - Engineered to provide radiant heat for your home, fireplace surfaces (in particular the glass window) will get hot during operation. Objects should be kept a safe distance away from the fireplace at all times. Never allow children to touch the glass. Adult supervision is required. We recommend using safety screen if you have children in the home. For additional hearth safety information visit - www.valorfireplaces.com/safety (&) www.hpba.org.

ABOUT OUR EFFICIENCY RATINGS - All Valor product literature is published using recognized Canadian and US government test methods for determining energy efficiency performance. This ensures our products will perform in your home as rated. Beware of misleading "steady state" efficiency claims made by manufacturers using their own "in-house" test methods. Examples include alterations to venting and installation restrictions which in turn produce false ratings. For more information please visit our website at www.valorfireplaces.com.
