RADIANT GAS FIREPLACE

G4

Legend Insert Series

Edgemont front in Brushed Nickel with small Backing plate, Pebble Beach Driftwood and Black Fluted liner.

Design and Efficiency

The **Valor**[®] Legend Insert Series has been providing reliable home comfort in North America for over two decades. The G4, the largest of the series, features the choice of six fuel beds along with several trims to suit your style. With Valor's advanced radiant heat technology, the G4 is sure to transform any room in your home into your new comfort zone.

Design

- Fits existing large fireplace openings without sacrificing presence or performance.
- Bold flames highlight an impressive viewing area.
- Proportional surrounds compliment your hearth.
- Fronts in Vintage Iron, Brushed Nickel, Bronze and Black; as well as Hammered Vintage Iron, Copper, and Oiled Bronze.
- Fuel beds include two Traditional Log designs, Rocks, Pebble Beach Driftwood, Murano Glass and Decorative Glass designs.
- Glowing fuel effects radiate and convect warmth.

Performance

Engineered for performance and efficiency, the G4

- increases your home's overall energy efficiency.
- provides ease-of-use heat control.
- effectively distributes radiant warmth and comfort.
- strategically distributes warmth to specific areas of your home with **Zone Heating**.

Exclusive to Valor: **AutoFire**[™]

Automatically adjusts for maximum performance

1. Makes initial startup easier by automatically adjusting air flow within the fireplace.
2. Provides improved operating efficiencies—saving you energy.
3. Fine tunes your fireplace for peak performance in ways fixed restrictors cannot—an industry first.

Please note:
images may vary from actual product.

5" Floating front in Bronze

- Traditional Logs (deluxe)
- Black Fluted liner

Select a front:

① EDGEMONT

Edgemont fronts are slim—about 2" wide on all sides—and slightly offset from the backing plate which sits flat against the wall.

Hammered Copper
Small Black backing plate

Brushed Nickel
Medium-sized Black backing plate

Hammered Vintage Iron
Small Black backing plate

Bronze
Small Black backing plate

Hammered Oiled Bronze
Medium-sized Black backing plate

② FLOATING 2.5"

The **2.5" Floating front** is offered in Vintage Iron. It sits proud of the wall or the optional backing plate by 1.5".

*Electrostatic powder-coated epoxy paint for a rich, durable finish.

**Electroplated and hand-finished for a durable, artisan appearance.

Select a fuel bed:

Traditional Logs, Deluxe (785KL)

- Detailed craftsmanship shows in the natural look of the logs.
- Glowing embers add to ambience and enhance radiant warmth.
- Engineered to provide excellent radiant performance.

Pebble Beach Driftwood (785Y)

- Specially designed to direct radiant heat into your living space.
- Captivating flames on both high and low settings highlight the realistic detail of the log designs.

Murano Glass (785Y)

- Inspired by the island of Murano's *fire on water* heritage.
- Flames illuminate clear tumbled glass, casting reflections on a perimeter glass base.

④ Traditional Logs

Traditional Logs (780K)

- Refined adjustment of the fire, with a low setting of 6500 BTUs.
- Distributes a steady, even glow throughout the firebox.
- Reflective glass base illuminates the hearth and highlights realistic flames.
- Ceramic logs strategically placed to offer the most radiant warmth possible.

⑤ Rocks

Rocks (780K)

- Offers a contemporary feel.
- Driftwood and river rocks nestle gently on a sand base, reflecting steady flames and impressive Valor heat.
- Captivating flames on both high (28,000 BTU) and low (6500 BTU) settings.

⑥ Decorative Glass

Decorative Glass (785Y)

- Flames illuminate clear tumbled glass, casting reflections on a perimeter glass base.
- Full bed of glass for maximum impact.

- Black riser

SmartFire™

RADIANT HEAT

Like heat from the sun, **Valor®** fireplaces distribute radiant warmth directly to your living space. Radiant heat satisfies human comfort needs, using up to 25% less energy compared to traditional forced air systems. Valor warmth efficiently replaces the chill from cold windows and doors with steady, even heat to people and objects in the room.

PACIFIC NORTHWEST DESIGN, DEVELOPMENT & DISTRIBUTION

Locally owned and operated in the Pacific Northwest, every **Valor®** fireplace is designed, developed and manufactured exclusively for North America. With a proven product family history, Valor continues to introduce unique fireplaces that stand the test of time.

EASY CONTROL

Standard with every fireplace, our **ValorStat** remote gives you full control of your experience. Adjust the flame and heat to meet your desired comfort level as the room warms or as the outside temperature falls—truly a fireplace for all seasons.

THE COMFORT ZONE

Reduce your furnace's output of hot air into empty rooms and unused spaces. Zone heating requires no ducting or forced air, and delivers radiant and convective warmth to the spaces you frequent the most. Where you want it—when you want it.

BURN CLEAN, ENGINEERED GREEN

Valor® specializes in the design of clean heat solutions for your home.

Our fireplaces use natural gas, the cleanest fireplace fuel you can burn, with the lowest particulate levels and lowest levels of greenhouse gases on the market.

PRODUCT VERSATILITY

Valor® products are extremely diverse in their application and design. Whether new construction or home renovation, we offer a wide range of options to help you select the right fireplace for your personal heating needs.

SAVINGS

Valor® designs innovative fireplaces that include many cost-saving features: for example, pilot flame that automatically turns off if your fireplace is inactive for over five days, saving energy and lowering overall home heating costs.

Keep forgetting to turn down your fireplace? Set the **ValorStat** to automatically turn down after six hours.

NO POWER, NO PROBLEM.™

If the power fails in the winter, your home can get cold fast.

Valor® fireplaces are fully functional heaters that don't require electricity. Our fireplaces provide the perfect mixture of radiant and convective heat, eliminating the need for a fan. No power, no problem.

NO FAN NECESSARY

We firmly believe that you shouldn't have to put up with the constant buzz of a fan to be warm. That's why we designed glowing fires to radiate heat and secondary heat exchangers to naturally circulate warm air by convection throughout the room. While a fan is an option, you'll likely find it unnecessary.

RELIABILITY

With over 100 years in the heating industry, we take pride in providing high-quality, safe products.

Every **Valor®** product undergoes extensive safety testing so it's no surprise that many customers own more than one Valor fireplace in their lifetime.

FIREPLACE SAFETY — USE RADIANT HEAT SAFELY

Fireplace surfaces, in particular the glass viewing window, are extremely hot during operation and will remain hot for a period of time after the fireplace is turned off. Contact with the hot glass can cause severe burns. Close adult supervision is required if there are young children, or at-risk individuals in the house. Included with your purchase, a **Valor®** barrier screen is recommended at all times. Install an approved after-market safety gate to keep toddlers, young children and at-risk individuals a safe distance from the fireplace.
