

AMERICAN  
FIREGLASS™  
FIREGLASS

*R*

eplace your drab fireplace  
décor with beautiful  
radiant American  
Fireglass! Fireglass is  
growing in popularity

as ceramic logs and lava rocks are becoming a  
thing of the past. Adding American Fireglass to  
your indoor and outdoor décor will give your  
entertaining areas new life and a modern look.  
Flames dance and flicker on luminous jewel-  
like glass, turning your fire pit or fireplace into a  
unique piece of art. With the multitude of colors  
you can create your own custom look.

The glass is formulated for long-term heat consumption. Thanks to our exclusive process  
used in creating the glass, it burns clean and efficient. It will not melt, degrade or emit toxic  
fumes. It will last virtually a lifetime and there is no soot, ash or smoke to worry about.

# The All New ECO GLASS

Eco glass is made up of post industrial glass that has been melted down and has a colored dye added to it to achieve its brilliant colors. It is made up of the same ingredients as our tempered glass so it can withstand temperatures of up to 1,300 degrees. This will allow you to "go green" (in 12 different colors) and enjoy an eco friendly product without the worry of it melting or sooting like other recycled products can.

**Sapphire Blue**
